Advanced **technical solutions** in plastics

Waste Policy Statement

This is the Waste Management Policy Statement of Advanced Plastics Limited. The policy reflects the company's commitment and ongoing improvement to waste management.

Advanced Plastics Limited will continuously monitor its production activities, waste streams, activities and legislation to reduce its production of waste & reduce waste to landfill.

All staff are receive training and are expected to abide by Advanced Plastics procedures and co-operate with management in the execution of this policy.

Staff are also encouraged to suggest improvement ideas and concepts to supports Advanced Plastics aims and targets.

Policy Aims

Advanced Plastics waste management policy is based on the principle that priority order of action is to:

- **Reduce waste produced:** Through the continual improvement of its production activities & reduce the waste that will be created for disposal.
- **Re-use:** Before discarding items, take action to re-use. Every option to re-use items must be explored before being discarded as wastes.
- **Recycle:** Advanced Plastics has implemented facility's to recycle numerous waste items and works with its suppliers to continuously review new opportunities to recycle.
- **Minimum waste to landfill:** KPI's have been set that include the monitoring and reduction of waste to landfill
- **Risk Minimisation:** Including considering the end of life disposal (costs and environmental impact) when making purchasing decisions and developing activities. Complying with regulations, legislation and applying best practice in order to minimise risks of immediate and future pollution or harm to health by disposing of waste appropriately.
